ITD 13203 SYSTEM ANALYSIS AND DESIGN

Objectives

1. Explain the methodology that is employed to analyze and design the system.
2. Identify the appropriate process modeling in the analysis and design of systems.
3. Introducing some software that can be used as aid tool in the analysis and system design process.

Course learning outcomes (CLO) :

On successful completion of the course, students will be able to:

CLO 1 : Describe the methodology and techniques that can be used in the analysis and design of information systems. (PLO5, C2, A1, P1, TS3)

GENERAL INFORMATION

2 CHAPTER 1: SYSTEM ANALYSIS AND DESIGN ENVIRONMENT

OBJECTIVES:

- Explain the role played in information systems (IS) development by the system analyst.
- Describe the fundamental Systems Development Life Cycle (SDLC) and its four phases
- Explain how organizations identify IS development projects.
- Explain the importance of linking the information system to business needs.
- Be able to create a system request.
- Describe technical, economic, and organizational feasibility assessment.
- Be able to perform a feasibility study.
